Continuation of 11. does NOT place the application in condition for allowance because: Regarding claims 1, 30, 58, the applicant argues on page 11 that Wynblatt does not disclose that the first device is portable user equipment in a mobile telephone system. Examiner respectfully disagrees with this argument. In col.3 3, lines 60-65, Wynblatt teaches that data entry mechanism of local agent is portable which is attached to a short range transmitter of the local agent. The local agent can be placed in a truck (see col.5, lines 61-62). It clearly means the local agent must be portable such that it can be flexibly placed in the truck or store etc.

The applicant further argues on page 12 that "Wynblatt certainly does not disclose such a flexible virtual noticeboard, enabling communication between several users". The applicant didn't claim the limitation.

The applicant further argues on page 12 that "Minneman does disclose mobile user equipment, it does not disclose portable user equipment. This argument is not relevant because Examiner does not rely upon Minneman to teach a portable user equipment. Thus, the rejection of the claims in view of Wynblatt and portable user equipment will remain.
